# Monday

On the first day we arrived at the school and met up with everyone. We took a trip around the school. I think school is cool but strange that high school and primary school is in the same building. We also learned how to take videos and edit them in a app called "Splice". After the school we went to a shopping mall. We stayed there for only few moments then we went up to the Bolt Tower and got to see Ostrava from a higher vantage point. We took a look around an old coal factory. After that we went to another tower. Then we went to see a old tank. We went back to the mall to go buy some groceries. I think Ostrava is a cool city. It's a lot more different than Iceland.
